ECONOMIC EFFICIENCY.  
SAFETY.**

## **MAN PROFIDRIVE® WE TRAIN THE FUTURE.**

The focus of companies, fleet operators, fleet managers and drivers in their daily working environment is increasingly on competitiveness, economic efficiency and safety. Attention is no longer concentrated exclusively on the new technical features of a vehicle. Instead, qualified further training of drivers is seen as a decisive measure for cost reduction. Equal contributions to a positive operating result are made both by employees who have perfect control over their vehicle, who have received in-depth instruction on the new technical features and know how to use these to the best possible effect, and also by employees who have mastered a careful and safe driving style and know how to avoid risks in traffic, thereby increasing safety, reducing fuel consumption and cutting the costs for wear and tear. In addition, driver absences due to illness can be minimised by suitable training measures. MAN ProfiDrive® contributes its expertise to provide comprehensive support to companies, fleet operators, fleet managers and drivers in more than 67 countries worldwide. MAN ProfiDrive® has continuously improved and expanded its training portfolio on the basis of daily interaction with its customers. Today, customer-specific training for niche markets is just as much a part of the MAN ProfiDrive® training offering as advanced professional driver training in accordance with the law on professional driver qualification (BKrFQG).

# MAKE TRANSPORT PROS EVEN MORE PROFESSIONAL.

## MAN ProfiDrive® truck

Driving a truck is definitely one of the toughest jobs around. And the job isn't getting any easier. In the past, driving skills and a road map were enough but nowadays the requirements are far greater. Drivers have to be optimally trained, always up to date on current regulations and act in an economically responsible manner. And that is exactly what MAN ProfiDrive® does: make pros even more professional.

### Economical driving

It's always the smartness of the combination that makes individual parts into intelligent solutions. Economical driving is by no means to be understood as slow and thus time-consuming driving. Our trainers show your drivers how to improve efficiency in daily operation with an anticipatory style of driving and optimal utilisation of the available technology. We aim at fuel savings of up to 10%.

### Economically efficient management

MAN ProfiDrive® offers practically-oriented training for managers such as company owners, fleet operators and fleet managers to help them manage their transport or logistics company with maximum economic efficiency.

# PASSENGER TRANSPORT – MAXIMUM RESPONSIBILITY.

## MAN ProfiDrive® bus

Safety has top priority. Always, everywhere. This applies in particular when people are directly affected. The focus in the passenger-transport sector is thus on maximum safety and its enhancement. Innovative technologies, but equally laws, guidelines and directives are continually redefining the requirements concerning safety and efficiency. And that is exactly what poses repeated, very special challenges to professional truck drivers, bus drivers and driving instructors.

### Economical driving

It's always the smartness of the combination that makes individual parts into intelligent solutions. Economical driving is by no means to be understood as slow and thus time-consuming driving. Our trainers show your drivers how to improve efficiency in daily operation with an anticipatory style of driving and optimal utilisation of the available technology. We aim at fuel savings of up to 10%, irrespective of whether it's a city bus, an intercity bus or a touring coach.

### Safety training

MAN ProfiDrive® bus training courses focus on mastering the vehicle with confidence in order to be able to offer the passengers maximum safety at all times. Practical exercises help drivers to react correctly in critical situations, such as braking in corners or avoiding unexpected obstacles. The fundamentals of the safety rules, behaviour in emergencies and detailed instruction with regard to road and environmental safety, crime, service provision and health at the workplace round off our program.

# AND THE BEST OF A GOOD THING?

One can become even better.

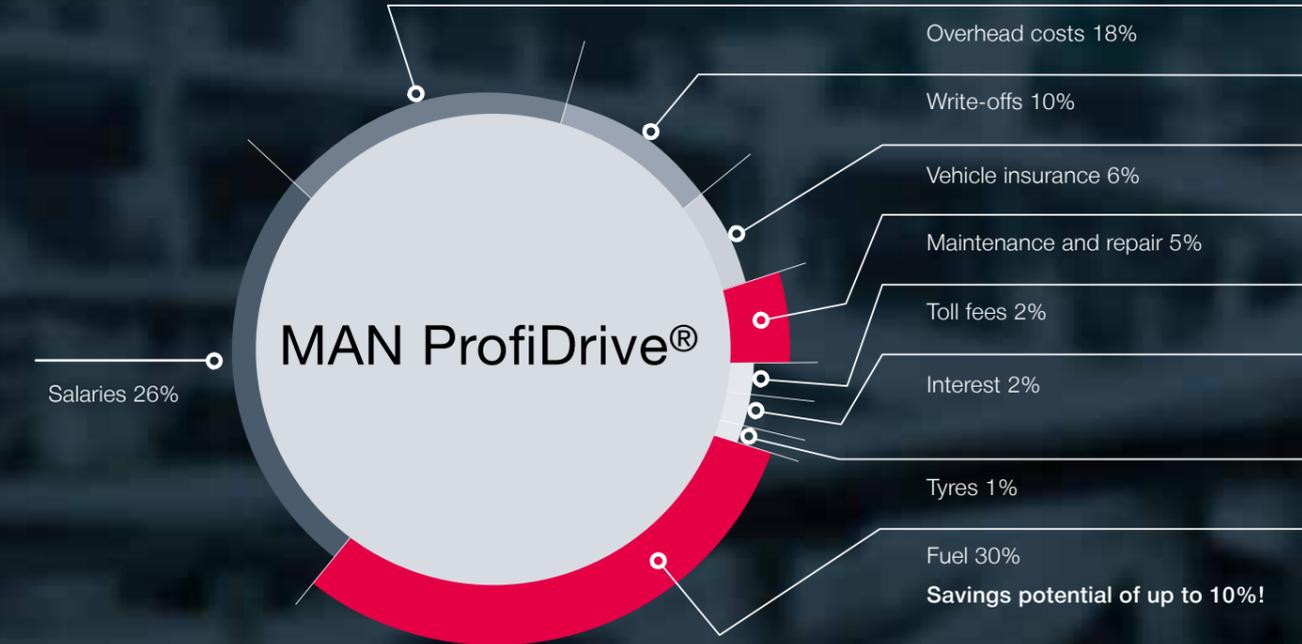

MAN ProfiDrive® offers a comprehensive range of training courses on topics relating to driving behaviour, driving safety and economical driving for truck and bus drivers. The range of courses on offer includes both advanced theoretical training based on the law on professional driver qualification (BKrFQG) as well as professional, practically orientated training, to make the daily job of the driver even safer and more economical.

Further special training courses for fleet managers, persons responsible for vehicle handover, driving instructors and experts as well as special off-road and heavy-duty transport training courses all have the same object: greater economy with safety.

Company owners, fleet operators and fleet managers can benefit from practically-oriented training measures and learn about the many different possibilities for managing their transport or logistics company with maximum economic efficiency.

# TCO BENEFITS AND SAVINGS POTENTIALS THANKS TO MAN PROFIDRIVE®.

Example of cost distribution for a TGX 18.440 4x2 over a period of four years with an annual mileage of 150,000 km in long-haul transport. The distribution of the TCO may differ depending on the country, type of vehicle and type of operation.
